

OCT 6

FALL WVR/SIDEWAYS PROMOTIONS NEWSLETTER

.....As for noise issues We tested 2 of those purely custom ends on a 250 and 450 Hondas. They replace the end on stock mufflers and get the decibels down to 96-98 with out jetting changes and no noticeable loss of power.. \$159 at www.purelycustom.com. A stock 450 is 102. **I also tested a db snorkel for 2 strokes. It lowers the decibels 3 to 8 over stock. Dyno testing proves no horsepower loss even on a cr 500. We tried it and it does a great job. It's is especially great for vintage bikes with older pipes.**
